Motor repair shops are said to be located on the road from Plovdiv to the village of Kuklen (N4202 H2447). Electric current is furnished by the power station of Vetce (sic). Since the supply of electricity is irregular, work in the plant is interrupted several times per day. There are 600 employees working at this plant. The guard service and the security service, aimed at preventing acts of sabotage, is entrusted to a Militia unit. There is an industrial school in the vicinity of the plant. At this school, two-year courses are given. Upon completing such courses, the students become regular employees of the plant, as qualified workers. Daily pay of a worker varies between 150 and 600 leva.
